

Plese reject NAB's petition 04-160. I'm a paid suscriber to XM Radio and benefit from thier uninterupted music and talk radio. If I can get local updated weather and other local information from a commercail free radio service I want to do it. Let the NAB find ways to compete in the market.

What's next? No satelllite radio at all? This is the new wave of entertainment, like it or not.

Respectfully
